PROFILE

With most Business and Interpersonal relations turning towards the online environment, websites are becoming the new home.

I work on creating functional and optimised Web solutions to foster these relations. This is achieved through my continuously growing knowledge in both Frontend and Backend technologies as well as UX design

I am a Life long learner who's got a thing for Music, Programming, and Burger

PROJECTS

•My agricDiary.(most recent project)

A social media site for farmers.

My agricDiary seeks to solve the problem of access to Market opportunities and Information to the local farmers in my home country Cameroon.

We Provide a community to share ideas and experiences as well as a marketplace to sell both agricultural inputs and outputs.

Technologies used include:

Django, Openweather api,Html,Css, Javascript,Figma

Project involvement:

Started as a learning project so i did all the work alone

Other projects can be viewed on my portfolio Website
